- **Thanks you Branches:** Thank you very much to Branches Bexhill and Hastings; Enfield & The Barnets; Streatham & Clapham; Harpenden and LASER for participating at our annual Environment survey.
- **Steps Already Taken:** Branches are holding hybrid committee meetings or summer council for raising awareness on climate change and regional events. Branches are supporting different project like Urban Tree project, Mvule tree-planting project. Some branches are using carbon calculator to measure carbon footprint at their different projects and encouraging people to use public transport under their action agenda.
- **Further Plan:** Branches are working on introducing, promoting and taking part in EnROADS, the interactive website for analysing and taking action through workshops. Branches are paying for trees for cities and promoting activities of the Climate Coalition to build awareness.
- **Main Difficulties:** Branches are facing challenges on raising awareness for reduction of carbon by trying to stop activities that increases carbon footprint.
- **Other Green Behaviour:** Branches are discussing and encouraging individual actions to spotlight different UN Environment activities for building awareness.
- **Thanks In Advance:** Thank you very much for listening to me.
